

CoHERP: Colorado Herptile Entry and Reporting Portal

CPW Herptile Reporting User Guide

Welcome to the Colorado Parks and Wildlife (CPW) Herptile Reporting system. This guide covers everything you need to know to successfully access the app, manage your permits, report animal captures, and log transfers. Please visit <http://cpw.info/herps> for more information on Wildlife and animal possession in Colorado.

Getting Started: Accessing the App

CoHERP requires you to create an account so your profile and reports can be securely saved.

- **Open the App:** Navigate to the provided app link on your smartphone, tablet, or desktop web browser.
- **Sign In:** You are required to sign in using a valid email address. This email will be used to send your official PDF reports.
- **Mobile Installation (Optional):** For easier access on a smartphone, you can install the app to your device by following the on-screen prompt to "Add to Home Screen" or by downloading the AppSheet host app when prompted by your browser.

Registering in the App

You must create profile to use the app to create and submit reports. You will need to include general identifying information, including

- **CID:** Your CPW Customer Identification Number, CID, is required to use the application. You can get a CID number [here](#) or look up an existing one [here](#).
- **License Number:** You must purchase a license and provide your valid license number to submit any non-legacy report. Legacy Reports are the only reports where a license is not required. You can purchase a license [here](#).
- **Education Certification Number:** To file a report you must take, pass, and obtain an Education Certificate Number. You can take the course [here](#).

Possession & Capture Limits

Please note the following legal limits before submitting your reports. The absolute maximum possession limit is twelve (12) herptiles total, across all categories combined.

- **Annual Capture Limit:** You may collect no more than four (4) wild-caught individuals per year. *(Note: Receiving an animal via a Transfer does not count toward this annual limit, but it DOES count toward your total possession limit of 12).*
- **No Commercial Use:** Wild-caught herptiles from Colorado cannot be used commercially.
- **No Release:** Once a wild-caught herptile is taken into captivity, it (and its progeny) cannot be released back into the wild.

Types of Reports

When you submit a new report, you will be asked to select a category. Here is what each report requires:

- **Wild Capture:** Used to log a newly collected animal from the wild. You must provide the specific location and date of the capture.
- **Giving Transfer:** Used when you are giving an animal to another licensed individual. You must provide the recipient's full name and contact information. Note: You can only select an animal that you have already reported in the system.
- **Receiving Transfer:** Used when you are receiving an animal from another licensed individual. You must provide the giver's full name and contact information.
 - **Important Rule for Transfers:** When an animal changes hands, both the giving party and the receiving party must file their respective transfer reports using the exact same Animal ID to properly track the animal.
- **Escape or Death:** Used to update the status of an animal currently on your permit. You must include a text description explaining how the animal died or where it escaped. Note: You can only select an animal that you have already reported in the system.
- **Legacy Possession:** Used to log animals currently in your possession under previous regulations. This includes Wild Caught, Captive Bred, and Beaded/Gila monsters. You may log up to 12 animals on a single Legacy report.

Submitting Animals and Photos

For standard reports, you can attach up to 4 animals per submission. For Legacy reports, you can attach up to 12.

The app will automatically provide a dropdown list of eligible species based on the report type you selected.

You must designate the sex of the animal (Male, Female, or Unknown).

- **Photos are optional but encouraged:** You can upload up to 4 photos per individual animal to aid in identification or provide proof of an escape/death.

Permitted Species

The app categorizes species based on CPW's official Rules and Regulations.

- **Wild Capture Reports:** Plains spadefoot, Woodhouse's toad, Boreal chorus frog, Common sagebrush lizard, Ornate tree lizard, Common side-blotched lizard, Prairie lizard, Plateau fence lizard, Gophersnake/Bullsnake, Western tiger salamander, Wandering gartersnake, Plains gartersnake, Tiger whiptail, North American racer.
- **Legacy Possession - Wild Caught Reports:** Includes all Wild Capture species listed above, plus: Plains hog-nosed snake, Common lesser earless lizard, Snapping turtle, Painted turtle, Ornate Box turtle, and Great Plains ratsnake.
- **Legacy Possession - Captive Bred Reports:** Corn Snake, Milk Snake, King Snake.
- **Legacy Possession - Beaded/Gila Reports:** Beaded Lizard, Gila Monster.
- **Giving & Receiving Transfer Reports:** Includes all Wild Capture and Legacy Wild Caught species listed above.
- **Escape or Death Reports:** All listed species are eligible.

The Signature Process

Every report requires you to certify your compliance with CPW regulations. You will be asked to agree to four legal statements regarding your residency, education certification, license validity, and the accuracy of your report. You can sign the document by drawing your signature with a touch screen/mouse, or by utilizing the accessible text-signature option to type your name.

Receiving Your Documents

After clicking submit, the system requires 5 to 10 minutes to generate your official PDF documentation. It will be emailed directly to the address associated with your profile, and CPW will be automatically carbon-copied for official record-keeping. You can request fresh copies of your past reports at any time via the "My Reports" tab in the app.

Help & Support

Because official PDF documents are generated automatically, **you cannot edit a report once you tap Submit**. If you realize you made a mistake on a submitted report, have questions about your capture limits, or need guidance, please email **DNR_Herp_Regs@state.co.us**. Please include your Name, CID, and the specific Report ID if applicable in your email.
